

Node.js 90-Day Daily Learning & Task Roadmap

Week 1–2: Node.js Fundamentals

- 1 Day 1: What is Node.js, V8, non-blocking I/O
- 2 Day 2: Node runtime, process, env variables
- 3 Day 3: CommonJS & ES Modules
- 4 Day 4: Core modules (fs, path, os)
- 5 Day 5: HTTP server without Express
- 6 Day 6: Event Loop deep dive
- 7 Day 7: Async programming & revision

Week 3–4: Express & REST APIs

- 1 Day 8: Express basics & routing
- 2 Day 9: Middleware concepts
- 3 Day 10: CRUD APIs
- 4 Day 11: REST standards & status codes
- 5 Day 12: Pagination & filtering
- 6 Day 13: Error handling
- 7 Day 14: Mini project

Week 5–6: Auth & Database

- 1 Day 15: MongoDB & Mongoose
- 2 Day 16: Schema design & validation
- 3 Day 17: JWT authentication
- 4 Day 18: Authorization & RBAC
- 5 Day 19: Refresh tokens
- 6 Day 20: Secure APIs
- 7 Day 21: Auth project

Week 7–8: Advanced Node

- 1 Day 22: Node internals
- 2 Day 23: Cluster & worker threads
- 3 Day 24: Performance optimization
- 4 Day 25: Streams & buffers
- 5 Day 26: Redis caching
- 6 Day 27: Rate limiting
- 7 Day 28: Optimization project

Week 9–10: Real-Time & Jobs

- 1 Day 29: WebSockets basics
- 2 Day 30: Socket.IO

- 3 Day 31: Real-time chat
- 4 Day 32: Online presence & typing
- 5 Day 33: Background jobs
- 6 Day 34: Queues & cron
- 7 Day 35: Real-time project

Week 11–12: Testing & Deployment

- 1 Day 36: Testing fundamentals
- 2 Day 37: Jest & API testing
- 3 Day 38: Mocking & integration tests
- 4 Day 39: Docker basics
- 5 Day 40: Dockerize Node app
- 6 Day 41: Deployment on EC2
- 7 Day 42: PM2 & monitoring

Week 13: System Design

- 1 Day 43–45: System design basics
- 2 Day 46–50: Design scalable backend
- 3 Day 51–60: Capstone project development
- 4 Day 61–90: Improve, refactor, deploy & prepare interviews
